RESEARCH INTERESTS

My interests span a range of topics in Comparative Politics. I study the formation and change of political attitudes and behavior in the context of contention, autocratic politics, and regime change. In my research I mostly rely on causal inference designs using observational data as well as survey experiments. In my dissertation project I investigate the implementation and downstream consequences of personnel transitional justice policies.

EDUCATION

Doctoral Candidate, Political Science   Since 2021
Osnabrück University

M.A., Political Science   2021
Osnabrück University

B.A., Political Science and Economics   2019
Osnabrück University
